# Chick Starter Crumble

CopRice Chick Starter Crumble is a complete crumble feed formulated specifically for replacement laying hens and ornamental birds from day old to 6 to 8 weeks of age.

CopRice Chick Starter Crumble is formulated to contain all the nutrients required to aid good growth and healthy chicks and young pullets. The excellent nutritive value of rice bran, along with quality grain and protein sources aids to provide an exceptional complete and balanced feed. Rice bran is naturally high in Omega 6 (an Essential Fatty Acid) which helps support good growth and healthy chickens.

CopRice Chick Starter Crumble is formulated with an anticoccidial feed additive which will help prevent the incidence of caecal and intestinal coccidiosis in young chicks. Caecal and Intestinal coccidiosis as an intestinal parasite and can be detrimental to the health and growth of young chicks and pullets.

## Feeding Guidelines:

- ✓ Feed CopRice Chick Starter Crumble without restriction and make sure all birds have access to the feed at all times.
- ✓ To encourage young chicks to eat, the crumble can be scattered around feeders, ideally on a flat, clean surface such as paper.
- ✓ Make sure all chickens have access to clean water at all times.
- ✓ The pelleting and crumbling process provides you and your chickens with a safer, convenient, uniform and cost effective product.
- ✓ Feeding CopRice pelletised and crumbled feeds ensures every mouthful is complete and balanced with the correct combination of vitamins, minerals, anticoccidial feed additive, energy, and protein. This pelleting process eliminates the risk of ingredient separation and in turn decreases the risk of wastage.

## Ingredients selected from

Cereal grains (wheat, maize, rice and/or sorghum), soybean meal, canola meal, wheat bran, rice bran, sodium bentonite, limestone, dicalcium phosphate, CopRice Chick starter vitamin and mineral premix including essential amino acids and coccidiostat, salt, choline chloride.

## Nutrient Specifications
